Synthetic Surfacing / Tennis

Wouldn't you like to improve the appearance and playing characteristics of your courts?

Then take a fresh look at how they would benefit with VHAF NottsSward TS. The ideal sand filled surface for clubs, schools and private courts.

Notts Sport tennis solutions provide the look and feel of grass courts without the need for high maintenance.

- **More consistent ball pace and bounce.**
ITF court surface classification category 3.
- **More comfortable underfoot.**
Kinder on knees and lower leg muscles. Cooler in high temperatures.
- **More positive surface and show interaction.**
Assists movement and creates confidence.
- **Faster drainage.**
Allows play very quickly even after heavy rainfall.
- **More durable.**
Retains performance characteristics for longer.
- **Less maintenance.**
Reduces aftercare time and expenditure, helps deliver excellent whole life value for money.
- **Easy to install.**
Over a variety of existing or new foundation. Transform tired old concrete/asphalt courts often with a minimum of preparation.
- **Difficult to abuse.**
Highly resistant to fire, cutting and graffiti.
- **Easy to repair.**

VHAF NottsSward TS is available in 15 colours which can be used to provide two colour court layouts.

Whichever shade or combination of colours you choose, surfaces are inlaid with white lines and your organisations name or sponsors logo can be inserted into the surface.

VHAF NottsSward TS is provided in standard court sizes, comes ready for easy installation with inlaid white lines and can be laid on a variety of existing or new surfaces. The perfect solution for refurbishing those old concrete or asphalt courts transforming not only the appearance but also providing additional user benefits such as comfort grip and ball performance.

What makes the VHAF NottsSward TS really different from other sand filled synthetic grass is the VHAF carpet pile.

Our 'vertical, horizontal and angular fibres' refer to the random structure of the pile. This is a Notts Sport exclusive feature and ensures the sand infill is stabilised more effectively than with alternative products. The benefits include:

- **Less movement of the sand**
Less maintenance
- **Less likely to compact and become hard**
Longer practical life
- **Less need to regularly add further sand**
Lower operating costs
- **Overall levels remain more consistent**
Better playing performance
- **More even horizontal sand distribution**
Increased slip resistance
- **Fully integrated fibre backing gives greater seam strength**
Less long term problems
- **Less sandy in appearance**
Visually more attractive

VHAF NottsSward TS has been independently tested in accordance with the ITF performance standards for tennis court surfaces, It is classified as category 3 - medium under the ITF surface pace classification scheme.
